Request for Admission (No. PHS-MLP-2-72): Admit that including a stakeholder review process in the process of preparing an IRP is considered a best practice in the electric utility industry. If your answer is anything other than an unqualified admission, state what you believe the truth of the matter to be.

Response: ML&P admits that a stakeholder review process is generally considered to be a best practice for developing IRPs; however, a stakeholder review process may be less important for publicly owned utilities which have governing bodies and advisory boards comprised of elected or appointed officials from the public, and which have open processes for the public to provide input.
