Request for Admission (No. PHS-MLP-19-58): At page 97, lines 8-18, Mr. Reed describes an expected decrease in ML&P's system heat rate (i.e., an increase in fuel efficiency) due to Plant 2A. Admit that the expected system heat rate with Plant 2A of 7.674 Mcf/MWh assumes that Plant 2A runs at or near to its maximum output. If your response is anything other than an unqualified admission, state what you believe the truth of the matter to be and the basis for your belief, and identify any documents supporting your belief.

Response: With the exception of planned outages, admitted.

Person(s) Supplying Information: Jeff Warner.
